DETAILED ACTION

Claims 1-10 are pending.

Claims 1-6 and 10 are withdrawn from consideration as being directed to the invention non-elected in parent application no. 09/770,564. A complete reply to this rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claims 7-9 are under consideration.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: it does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56. Applicant is required to list the US application 09/352, 168 and the provisional application independently.

Claim Objections

At claim 9, " a fungus producing fumonisin" should be replaced with ---fumonisin producing fungus---, for clarification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is indefinite because "the fumonisin esterase and APAO enzymes" lacks antecedent basis.

Written Description

Claims 7-9 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims are drawn to a transformed plant comprising a polynucleotide having at least 95% sequence identity to SEQ ID NO: 5 or 10, and a method for reducing fumonisin by expressing said polynucleotide in a plant.

The claimed invention does not meet the current written description requirements because the claims do not recite a functional language. The polynucleotide sequence having 95% to SEQ ID NO:5 or 10 has no known function. A transgenic plant expressing a polynucleotide having unknown function is not adequately described. While the claims have to be read in the light of the specification, the limitations in the specification cannot be read into the claims.

This rejection can be obviated by inserting ---, wherein the polynucleotide encodes a polypeptide having fumonisin degrading activity----, in claims 7-9.

See Written description Examination Guidelines published in Federal Registry/Vol. 66, No.4/Friday, January 5, 2001/Notices).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 7-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,211, 435. Although the conflicting claims are not identical, they are not patentably distinct from

Art Unit: 1638

each other because the invention claimed in both the application and the issued patent encompass transformed plants including specific plant species comprising SEQ ID NO: 5 or 10 , and a method for reducing fumonisin in a transgenic plant with said polynucleotide. The invention claimed in the application, drawn to a transformed plant comprising an isolated polynucleotide having at least 95% sequence identity to SEQ ID NO: 5 or 10 and a method for reducing fumonisin in a transgenic plant with said polynucleotide are broader in scope than the transformed plant comprising the polynucleotide of SEQ ID NO: 5 or 10 and a method for reducing fumonisin in a transgenic plant with said polynucleotide claimed in the patent, and therefore encompasses the invention claimed in the issued patent. Therefore, the instantly claimed invention is obvious over the invention claimed in the issued patent.

Remarks

No claim is allowed.
